 Subject: Allied Landfill

Rep. Upton will be asking Administrator McCarthy the following question at a hearing tomorrow. In the next hour or so, please propose talking points ASAP at **'d spots below:

It is my understanding that EPA is moving toward a selected remedy for the Allied Superfund Site in Kalamazoo, MI based upon the Feasibility Study (FS). I am concerned, however, there are issues yet to be resolved and for which the FS study failed to account, such as a lack of recent data and monitoring of wells onsite, the availability of alternative remediation technologies, and reuse and redevelopment options. How can you assure me that these outstanding issues will be addressed before EPA issues the preferred cleanup option?

**

And, specifically, how will EPA account for the community's redevelopment plans moving forward?

**
